

DATA SECURITY | COMPLIANCE READINESS | RESPONSIBLE AI | TRAINING | SPECIALIZED STAFFING

I am pleased to introduce **Karatin LLC**, a small, woman-owned business specializing in data security, Microsoft 365 security and compliance, and information governance. We help organizations identify and reduce risks involving sensitive information, inappropriate data access, data leakage, regulatory requirements, and the expanding use of artificial intelligence within Microsoft 365 environments. We also provide responsible AI readiness, role-based training, and specialized staffing support.

THE KARATIN DIFFERENCE

Rapid Risk Response - Quickly identify and resolve security and compliance gaps, reducing operational disruption and the burden of audits.
Learn-in-the-Flow Training - Short, role-specific training that minimizes time away from work and improves employee productivity.
Retention Guarantee - Follow-up retraining at no additional cost when employees need reinforcement.
Safety by Design - Protect sensitive data without creating unnecessary barriers to employees or business operations.

We would welcome the opportunity to introduce Karatin LLC and learn more about your organization's current and upcoming requirements. We would also be pleased to discuss opportunities where our consulting, training, and specialized staffing capabilities could support an existing prime contractor or complement a larger project team.

Please let us know a convenient date and time for a brief introductory conversation.

Best Regards,

UEI EJGLFLLKUKK8	CAGE 23FF5	HEADQUARTERS Frisco, Texas
